I am a tech enthusiast with a broad skill set in Technology, Code and Business Analytics. This eclectic mix of technical familiarity and business sense makes me a good fit in any organizational structure.

PROFESSIONAL EXPERIENCE

Application Developer: Vernost

Aug 2020 - Present

- Full Stack Web Development with MEAN stack

Application Support Engineer: Vernost

Feb 2020 - Jul 2020

- Troubleshooting Angular applications.
- Collaborating with client assets to ensure robustness of external application components.
- Automating routine report generation for business requirements.

Associate Category Manager: Packt Publishing

Mar 2019 - Feb 2020

- Created new exploratory products for Packt based on Market research. This includes updates for booming areas as well as experimental learning resources. (All with the IT sector, specifically programming.)
- Ensured the products we developed were entrusted to the appropriate field experts and assisted with the profile scrutiny.
- Part of the editorial board for books and videos providing inputs based on broad technical accuracy as well as commercial viability.
- Guided and encouraged team members to formulate their approach towards positioning and developing courses that align well with our target audience.
- Introduced revised products based on sales data and ensured they were restructured with the feedback we've received from our customers.

Web Solution Specialist: Endurance International Group

Mar 2017 - Jun 2018

Server Management:- Troubleshooting, Database and Site Data Migration, Server Abuse Handling, Software Configuration, Cloud server deployment and scaling • **Server Monitoring:-** Thruk, Zabbix & Kibana (API) • **Server Security:-** Sitelock, Codeguard, SSL - Let'sEncrypt, Comodo • **Client Gui Installation, configuration and Support:-** cPanel / WHM, Parallels Plesk Panel, WHMCS, FTP. • **Third party product support:-** Impress.ly, Jiggy, Weebly • **Domain Management:-** Registration, Renewal, Redemption, and Transfer of various nTLDs, gTLDs and ccTLDs using RESTful API. • **Email Service Management:** GSuite, OX App Suite, Horde, RoundCube, MailEnable, SquirrelMail. • **CMS:** Installation & Setup for WordPress, Joomla, Magento, Drupal.

Project Upsell: Helped customers select the right product for their business via an Upsell mechanism, thereby increasing the revenue of the business.

Project Saves: Understand why an existing customer would like to delete a product from our system and then work with the Product, Marketing and Sales teams to reduce customer churn.

Net Promoter Score: Performed a quarterly score review with our customers to get feedback about our products, and then work with the Business, Marketing and Product teams to make sure all customer feedback is heard and worked upon, which helped the business reduce customer churn.

All this was enhanced by countless proprietary and third-party productivity tools to make the most efficient use of time.
